Caution

In greenhouse do not apply concentrations above 100mL/100L. In case of mixing with several products, make a preventive "jar test" on a small area. Avoid spraying under hot, sunny daylight and during crop blooming. Presence of Copper on plant canopy can reduce product absorption.

FOLIFLO® Mg is a fluid Magnesium-based fertiliser, easy to use. Thanks to its high concentration and safe formulation it is particularly suited to correct and to prevent Magnesium deficiencies. Magnesium is an essential nutrient for the plants, being part of the chlorophyll in all green plants and essential for photosynthesis. It also activates many plant enzymes needed for growth. In grapevine, Foliflo® Mg prevents and cures stem dieback.
